Cold storage

To improve food safety standards, Wegdam Food Link is working on a widespread network of cold stores throughout Ghana together with local partners. A concept called 'Give and Take'. We help our customers using our knowledge and experience and facilitate where we can. The result of this concept are highly modern cold stores, powered by solar energy.

Through these developments we are sure our frozen products will reach the end consumers safe and sound. An investment we all benefit from.

Customer support and equipment

We see our customers as our partners. That's why our service doesn't stop when our products have reached their destination. Besides the supply of our food commodities we support our partners with consulting on cold storage and physical distribution.

This consultancy includes the supply of:

- Trucks, tractors and frigo vans
- Panels for cold storage
- Protective working clothes
- Reefer containers
- Aggregates
- Fork lifts

► Solar, let the sun keep it cool!

We care for a sustainable world. That's why we go further than just supplying the food products that Africa demands. Wegdam Food Link facilitates customers with solar panels to provide energy for cold stores. We use our knowledge and finances to convert the energy of the hot sun to cool your frozen products. In Ghana alone we already installed over 2,200 square meters of solar panels.

"Trading is much more than just buying and selling."

Wegdam Food Link

A world-wide operating company based in the Netherlands, with offices in Brazil and Ghana. Specialist in the supply of a wide range of dry and frozen food items. Through our vast network of partners and suppliers we can offer a wide selection of quality food products from all over the world.

Our philosophy

Trading is one of the sweetest sounding words. In simple terms it means nothing but buying and selling, but in our view that's not enough in the current international food business. The world is getting more and more transparent; the world as a village. The market is open, with more choice than ever.

Our philosophy is to see customers as people, people with ambitions. We want to help them to achieve their goals and we do not mind putting something on the line for that. Because even in this modern world: *trading is so much more than just buying and selling.*

Our approach

We look carefully to the needs of each of our customers and facilitate wherever we can. We help people to grow. This personal approach enables us to establish sustainable relations. With our suppliers and producers we also cooperate in an enduring mode.

This long-term focus pays off. Our selected suppliers can count on their sale on a solid base and our customers can count on the excellent quality products we offer. Together we build on sustainable relations in a sustainable world.

Brands and products

Wegdam Food Link can deliver frozen poultry, meat, fish and dry-food of the well-known brands underneath. We are the sole distributors of the brands Nana, Chef Special and Fancy Fish. These brands stand for premium products, that are produced according to European food safety standards.
